PRODUCTION PROCESS

Fishmeal is produced in Norway and/or Denmark and/or Iceland with high technical and hygienic conditions. Fishmeal is a whole meal dried in a multiple drying process with all solubles included. The most effective chemical and salmonella control is carried out ensuring that the meal is of approved quality before shipment.

APPLICATIONS

Fishmeal is characterized by high protein content with a favorable amino acid composition. The meal is mainly used in feed mixtures for fish, poultry and pigs.

SPECIFICATIONS

SPECIFICATIONS	MIN	TYPICAL	MAX
Protein		70,0 %	
Moisture			10,0 %
Fat (Soxhlet)			13,0 %
Salt (NaCl)			4,5 %
Total Volatile Nitrogen (TVN) 0,3 %			0,3 %
Salmonella	not detected		
Antioxidant	ethoxyquin		
Contaminants	EU limits		

AVERAGE VALUES

MINERALS, AVERAGE VALUES	% IN DM
Calcium	3,3
Phosphorus	1,9
Sodium	1,2
Potassium	1,5
